

On a Word document, create table format with this information across the top:

1. Website name
2. Registrant name
3. Address
4. Email contact
5. Date website was registered
6. Date website registration will expire

Whois domain name lookup, available domain names, domain keyword search, deleted domains:		Explanation of Tool:
WHOIS Lookup	<input type="text"/> .com <input type="button" value="Go!"/>	Lookup registration data for domains.
Search by domain or keyword	<input type="text"/> <input type="button" value="Go!"/>	Search domains and lookup whois information. Research and protect trademarks.
Domain Lookup	<input type="text"/> .com <input type="button" value="Go!"/>	Find available domains.
Search through deleted domains	<input type="text"/> <input type="button" value="Go!"/>	Find previously registered domains that are now available.

Click on [Whois. Net](http://Whois.Net)

1. Key in **oakparkusd.org** in the Lookup box. Enter the information requested in your Word document.
2. Find nine (9) other web names you are familiar with, and complete the same exercise as number one.
3. Click on the down button next to .com and list 6 different top-level domains suffixes, for example: org, mil, us. Using Google/Bing find out what organizations use each of the six top-level domains that you chose. Add this information to your Word Document. Save as whois_your_name. Place a copy in the class inbox.
