

Computer Programming
TECHNOLOGY:

MONDAY/TUESDAY

1. Watch the videos [HERE](#)

2. Research the computers at <http://laptop.org/en/> Learn all about the computer. Read all the web sections. Work with the sample laptops, open some programs and take turns learning the features.
3. With your partner, find the software page for the laptop program, and list the name of the open-source software developed for the XO laptop. Click into the sites for each of the O/S programs and research them.
4. Write a one-page summary detailing the development of the XO computer, how many have been delivered to date, find two locations in the US that have the machines. How much do the machines cost? Is there a new model being developed? Describe the purpose of open source software. Provide detailed information about the different O/S.
5. Name your file XO-Your names. Save your work file, and place a copy in the class inbox.
