Web Diagram Software

EDraw Max is a vector-based diagramming software with rich examples and templates. Easy to create flow charts, organizational charts, business process, UML diagrams, work flows, program structures, network diagrams, chart and graphics, mind map, directional maps and database diagrams. With pre-drawn libraries and more than 2000 vector symbols, drawing couldn't be easier! With EDraw Max, you can create a wide range of diagrams using templates, shapes, and drawing tools while working in a familiar office environment.

Web Site Map Template

Use the Web Site Map template to discover links and generate a site map for a Web site on an HTTP server, network server, or local hard drive.

Site maps help you maintain and troubleshoot your site. Use them to analyze your site's organization and to classify its content. Site maps are particularly helpful when you inherit sites you're not familiar with.

Draw site maps for web sites on HTTP servers, network servers, and local hard drives.

Conceptual Web Site Template

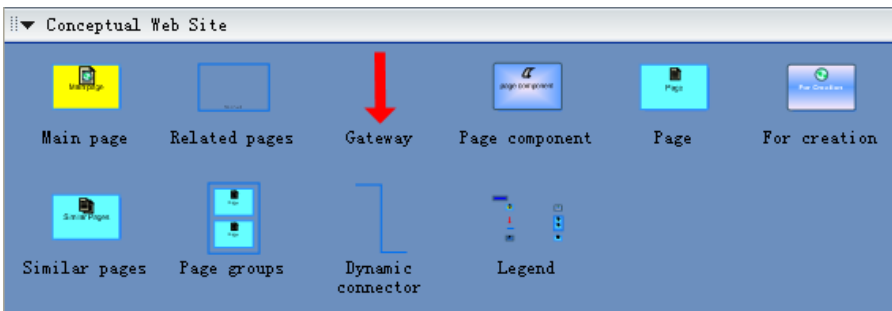

Design conceptual diagrams and high-level architectures of home pages, Web sites, and hyperlinked documents.

A well-organized Web site begins with a plan. The first step in developing this plan is to brainstorm about the big picture - the site's purpose, content, and overall organization. You can stimulate this discussion by creating a high-level, conceptual diagram of your new Web site using the Conceptual Web Site template. You can also use this type of diagram to reorganize an existing site.

User Reviews

I really do appreciate finding such a well-thought-out web site design software with so many choices and ways to do things. There are a lot of software out there but after trying several, I'm convinced that this one has the most to offer for a good price - some of the heavy CAD programs are too much for the likes of me, people who don't need that much power nor extent to create some of the in-depth plans and drawings. This one appears as though it will give me all that I need & want. Thanks again!
